

Umang Kumar

FULL STACK DEVELOPER

Greater Noida | umangkumarravi123@gmail.com | +91 9258405605 | LinkedIn | Github | Portfolio

Professional Summary

Full Stack Developer with hands-on experience building and maintaining web applications using Vue.js, React.js, Node.js, MySQL, JavaScript, REST APIs, and Server-Side Rendering (SSR). Experienced in developing enterprise applications, content and media platforms, permission-based systems, API integrations, and reusable frontend and backend solutions with a focus on performance.

Education

Galgotias University , B.Tech in Computer Science and Engineering	(CGPA:8.0/10)	August 2022 – May 2026
• Coursework: Data Structures and Algorithms, Database Management System, Object-Oriented Programming.		
MDS Inter College , XIIth	(Percentage: 75%)	April 2021 – June 2022
ARN Kela Inter College , Xth	(Percentage: 81%)	April 2019 – May 2020

Skills

- **Languages:** Java, JavaScript, SQL.
- **Frontend Technologies & Frameworks:** Vue2.js, React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, DOM, TypeScript.
- **Backend & APIs:** Node.js, Express.js, REST APIs, JSON, CDN, SSR.
- **Databases:** MySQL, MongoDB.
- **Tools & Development:** Git, GitHub, Netlify, Render, Railway, Vercel, Debugging.

Experience

Full Stack Developer Intern Site Guru Private Limited	June 2026 - Present
• Built and maintained full-stack web applications on the Site Guru platform using Vue.js, Node.js, MySQL, CSS and SSR, contributing to 80+ backend modules and 100+ reusable frontend components across multiple production applications. • Implemented role-based authentication and authorization with user-type management, protected routes, and permission-based access control, integrating 20+ RESTful APIs across enterprise web applications. • Developed content and media management features with CRUD workflows, chunk-based large file uploads, CDN integration, and optimized SQL queries, improving reliability and maintainability across production applications. • Built reusable frontend components, dynamic routing, SEO-friendly metadata, category-based content rendering, and SSR-powered pages to deliver maintainable and SEO-ready web applications.	

Projects

NewsOrbit News	Live
• Engineered a scalable full-stack news platform (NewsOrbit) using Vue.js, Node.js, MySQL, and Server-Side Rendering (SSR), delivering 80+ backend modules, 100+ reusable frontend components, and a centralized permission-based architecture. • Architected a secure role-based authentication and authorization system supporting 5 user roles (Parent Admin, Parent Employee, Child Admin, Child Employee, and End User) with fine-grained permission management. • Developed and integrated 20+ RESTful APIs for authentication, CRUD operations, organization management, employee management, dashboard analytics, and secure server-side validation with optimized SQL queries. • Built reusable Vue.js components, implemented global state management, dynamic routing, and SSR-powered rendering, improving application scalability and maintainability.	
HDTV Bharat	Live
• Implemented global state management, dynamic routing, responsive UI components, SSR-powered rendering, and SEO-friendly metadata for scalable content delivery. • Built responsive user interfaces with category-based navigation, homepage rendering, user authentication, profile management, and seamless video playback for an enhanced viewing experience. • Integrated and consumed 15+ RESTful APIs, optimized routing, API communication, and state management to ensure smooth navigation and efficient content delivery. • Integrated backend APIs, resolved production issues, optimized application performance, and improved platform reliability while maintaining a clean, modular codebase.	

Certifications & Achievement

Java Full Stack Certification – Wipro	LinkedIn
LeetCode Profile	LeetCode
